

Doppler Exercise Sensing

Smartphone Doppler Ultrasound for Improved Activity Quantification

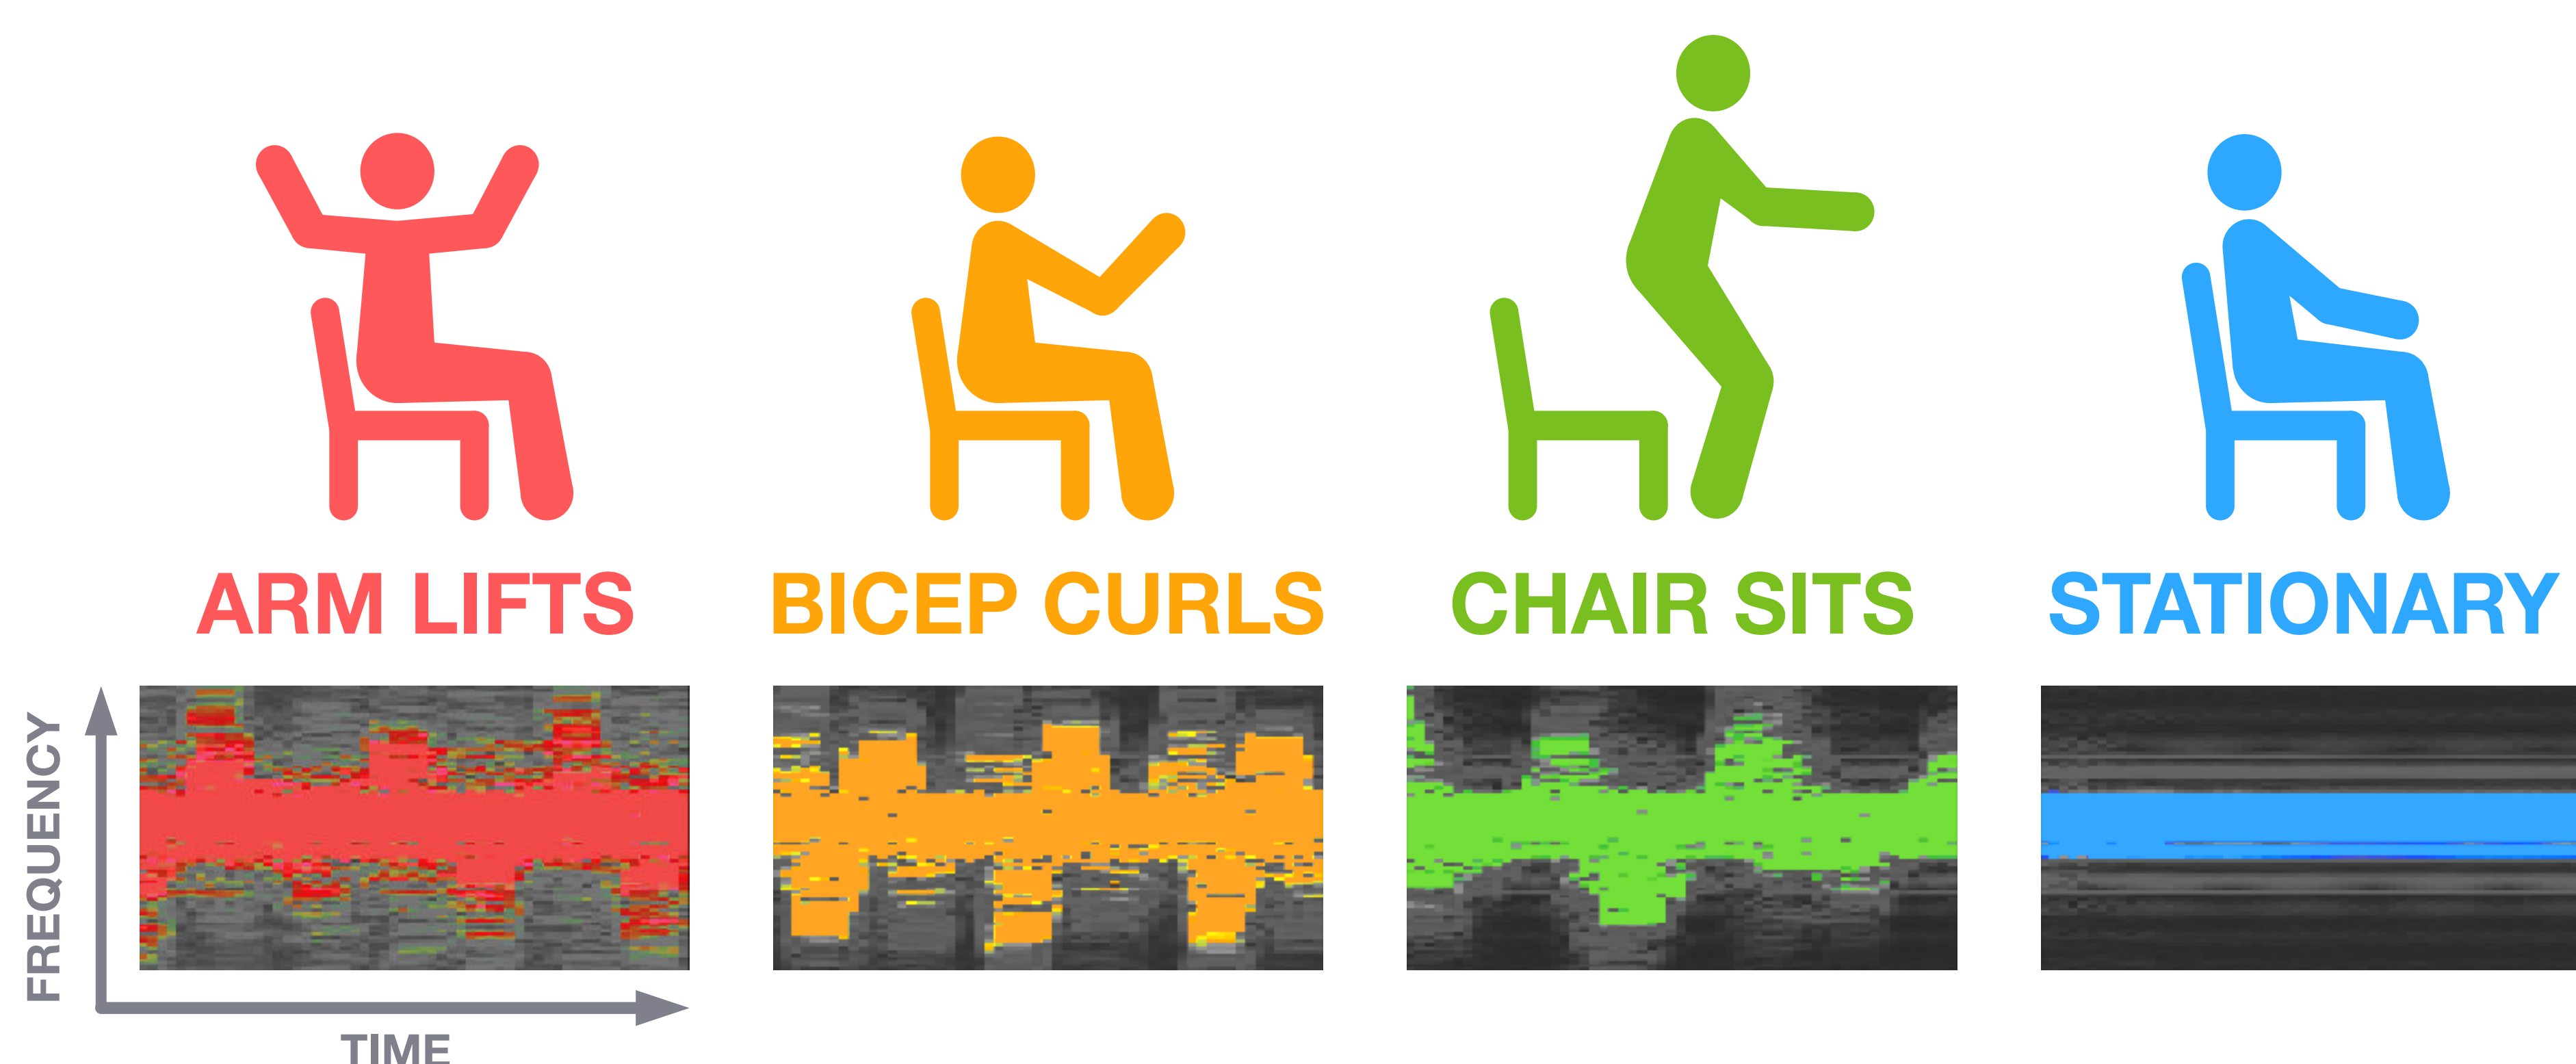

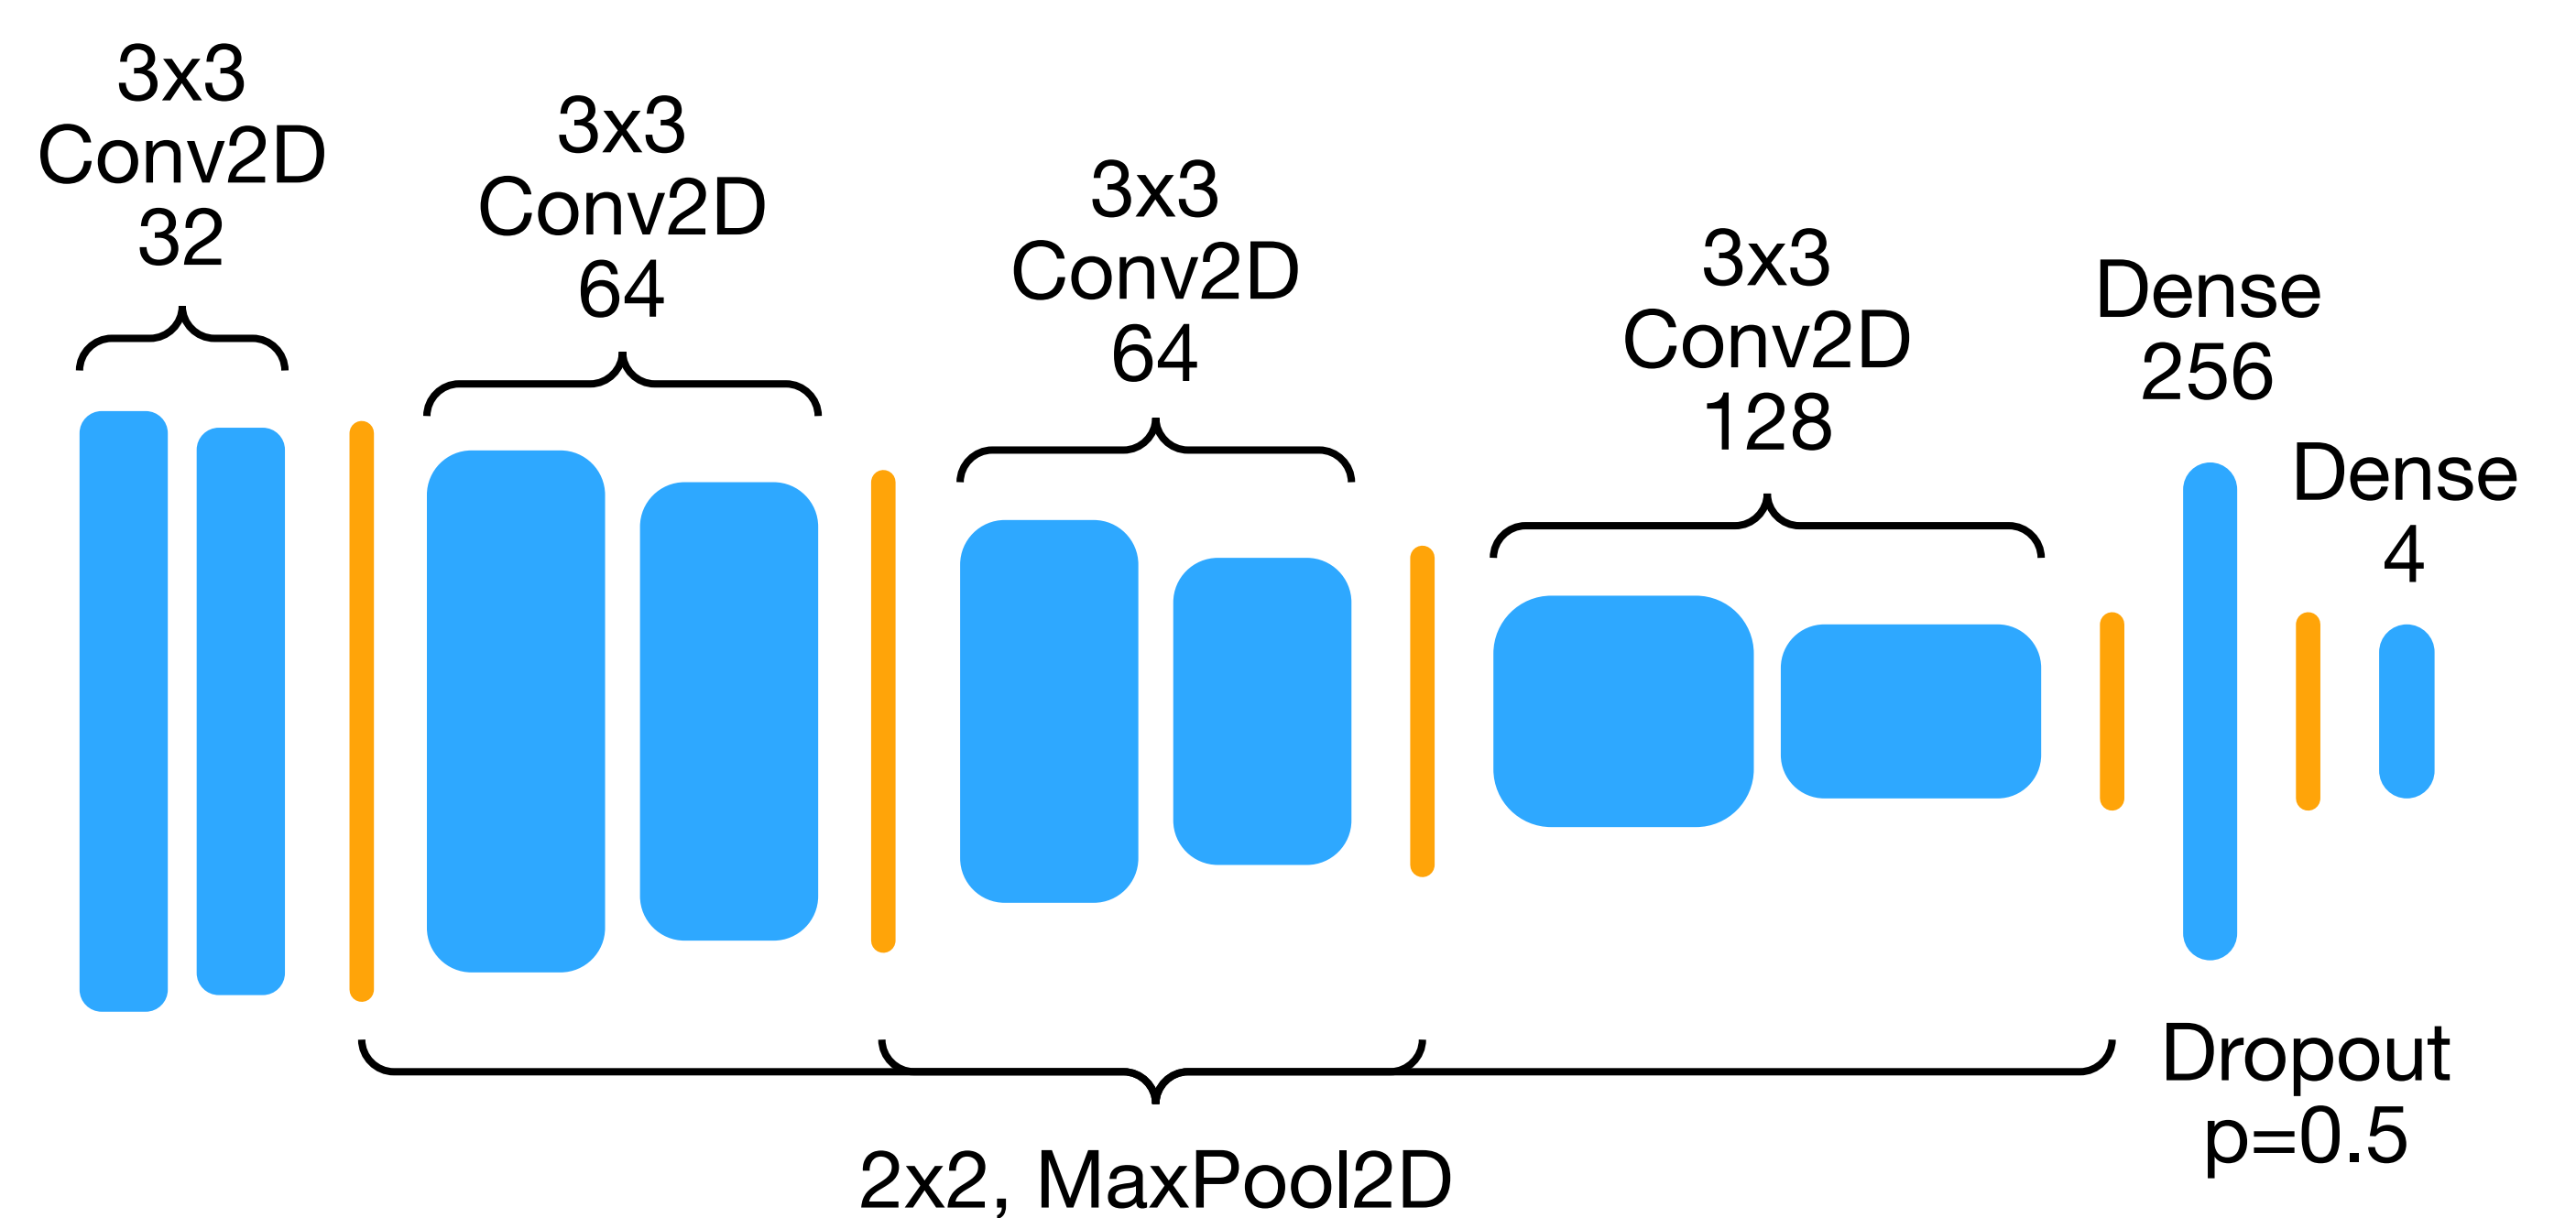

Physical inactivity is an EPIDEMIC

- ▶ Physical inactivity is the **4th** leading risk factor for death.
- ▶ **80%** of US adults do not meet national guidelines.
- ▶ Physical activity should be measured as a **vital sign**.
- ▶ Step count is an ineffective measure for **sedentary individuals**.

Pilot Study

3 test subjects	15 -layer CNN
4 seated exercises	10 -fold cross validation
571 total samples	95% accuracy overall
